

Regenerative Pilot Project- Prairie Revitalization and Agricultural Improvement for Resilient, Integrated Ecosystems (PRAIRIE)

Locally Led. Conservation Driven. Producer Focused.

Why PRAIRIE?

Soil Health Solutions

Improve soil health and addressing salinity for healthier crops and land.

Wetland Impact

Enhancing water quality, wildlife habitat, and agricultural productivity across 39 counties.

What's New?

\$30 Million

Dedicated funding to tackle soil health and salinity issues across the Prairie Pothole region.

Priority Conservation Practices include but not limited to:

- Field Borders
- Riparian Herbaceous Cover
- Filter Strips
- Annual Forages for Grazing
- Grassed Waterways
- Salinity & Sodic Soil Management
- Wildlife Habitat Management

How It Works

Utilizes existing programs **EQIP** and **CSP** under the Regenerative Pilot Program.

Prioritized Applications

Focus on projects that address soil health and salinity for maximum impact.
